

# Equality of Opportunity

## Economics of Public and Social Issues

Jonathan Moreno-Medina

ECO3253, UTSA

2026-04-08

# Outline

1. Geographical Variation in Upward Mobility in America
2. Causal Effects of Places vs. Sorting

Lecture based primarily on the following paper:

*Chetty, Friedman, Hendren, Jones, Porter. "The Opportunity Atlas: Mapping the Childhood Roots of Social Mobility" NBER WP, 2018*

## Geographical Variation in Upward Mobility

# Differences in Opportunity Across Local Areas

- ▶ How do children's chances of moving up vary across areas in America?
  - ▶ Are there some areas where kids do better than others? If so, what lessons can we learn from them?
- ▶ Recent studies have used big data to measure how upward mobility varies based on where children grow up

# The Opportunity Atlas: Data Sources and Sample Definitions

- ▶ Data sources: Anonymized Census data (2000, 2010, ACS) covering U.S. population linked to federal income tax returns from 1989-2015
- ▶ Link children to parents based on dependent claiming on tax returns
- ▶ Target sample: Children in 1978-83 birth cohorts who were born in the U.S. or are authorized immigrants who came to the U.S. in childhood
- ▶ Analysis sample: 20.5 million children, 96% coverage rate of target sample

# Measuring Parents' and Children's Incomes in Tax Data

- ▶ Parents' household incomes: average income reported on Form 1040 tax return from 1994-2000
- ▶ Children's incomes measured from tax returns in 2014-15 (ages 31-37)
- ▶ Focus on percentile ranks in national distribution:
- ▶ Rank children relative to others born in the same year and parents relative to other parents

# Intergenerational Income Mobility for Children Raised in Chicago

Figure 1: Source: [Chetty, Hendren, Kline, Saez \(QJE 2014\)](#)

# Intergen. Mobility for Children Raised in Hypothetical Census Tract

Figure 2: Source: [Chetty, Hendren, Kline, Saez \(QJE 2014\)](#)

# Estimating Children's Average Outcomes by Census Tract

- ▶ Run a separate regression using data for children who grow up in each Census tract in America
- ▶ In practice, many children move across areas in childhood
- ▶ Weight children by fraction of childhood (up to age 23) spent in a given area

# The Geography of Upward Mobility in the United States

Figure 3: Source: [Chetty, Friedman, Hendren, Jones and Porter \(2018\)](#)
